

GOLLAHER RANCH

**36th Annual
Yearling Angus Bull Sale**

Monday, April 6, 2015 • 1:00 pm
At the ranch • Cascade, Montana

85 Yearling Angus Quality Carcass Bulls

Myrle & Delight Gollaher
3112 Cascade Hound Creek Road • Cascade, MT 59421
406-468-2273

www.GollaherRanch.com
gollaherranch@yahoo.com

Welcome to the 36th annual Gollaher Ranch yearling bull sale. Thank you for looking over our sale offering.

We are offering a set of bulls that we feel were bred to provide calving ease, without compromising their performance for growth, feed efficiency and carcass value. These are all traits sought by progressive cattle producers.

Eighty (80%) percent of the bulls are suitable for use on heifers. We have tried to emphasis length of body, depth, muscling, and temperament in selecting the bulls for the sale.

We feel the 2015 bulls will mature into a great group of cow bulls adding to their value and a nice return on your original investment.

Data in this catalog is as of Feb 20, 2015. Final weight, scrotal measurements, and ultrasound scan data will be available sale day. If you have any questions about our operation, the bulls or our cow herd, please contact us.

Thanks for your interest in our sale and we look forward to see you on Monday, April 6, 2015. Lunch is at noon and the sale starts at 1 pm.

-----The Gollahers

For dollars invested in bulls, we offer the best value you will find anywhere.

36th Annual

GOLLAHER RANCH BULL SALE

At the ranch • Cascade, MT • Lunch Served at 12:00 Noon

MONDAY
APRIL 6, 2015 • 1:00 PM

Lunch Served at Noon

Sale Location

Gollaher Ranch is located 6 miles SE of Cascade, MT. Take Exit 254 (from S) or 256 (from N) off Interstate 15, turn East on Central Avenue, cross the Missouri River and follow MT Hwy 330 to the ranch. Watch for signs.

Delivery

Gollaher Ranch will deliver bulls free for the first 250 miles, after that charges will be at cost. Delivery will occur as soon as possible after the sale.

Sale Day Phone
406.468.2273

Insurance

Bull Mortality & Loss of Use Insurance through PayneWest Insurance. See information on page 20.

Auctioneer:
Roger Jacobs
406.373.6124

Announcements

Announcements from the block by the owners or auctioneer will take precedence over printed material. Supplemental data and corrections will be available sale day.

Bidding

Absentee bidding maybe made with any of the livestock press representatives or the auctioneer, Roger Jacobs. Contact the Gollaher family if you need any other assistance or have questions

Terms and Conditions

All bulls sell under the terms of the American Angus Association. Settlement must be made at the time of sale unless prior arrangements have been made with the owners.

Livestock Press Representatives

John Goggins..... 406.698.4159
Western Livestock Reporter
Kurt Kangas..... 661.706.2041
American Angus Assn
Don Rehm..... 406.322.4707 or 406.321.2000 (cell)
Special Assignment

Liability

Gollaher Ranch or Myrle or Delight Gollaher will assume no liability whatsoever for any accidents or injury which may occur sale day.

Health

All bulls have been semen tested with a complete breeding physical under the direction of Hilt Veterinary Service, Dutton, MT. All bulls will be BVD tested.

Transportation & Accommodations

Gollaher Ranch is 30 minutes south of Great Falls International Airport Motel accommodations available in Cascade:

Badger Motel 406-468-9330

A & C Motel 406-468-2513

Please contact us for further assistance.

EPD Data

Data not contained in this catalog for the individual bulls will be available sale day. Epd's are as of Feb 20, 2015. Ultrasound data, final weights and scrotal measurements available sale day.

***Buying, Selling And Raising Cattle With
An Emphasis On Quality Carcass Traits.***

whether it's for the cattle or horses.***

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire’s genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire’s ability to transmit yearling height, expressed in inches, compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire’s daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Bull Mortality and Loss of Use Insurance

NEW! Lower Premium Rate - 10% of Purchase Price

Values	Bulls valued up to \$1,000,000; not to exceed purchase price.
Term	12-month policy term.
Premium	10% of the purchase price.
Coverage	Full Mortality and Loss of Use.

Thank you...

Thank you to all who make our sale possible. From you the buyers, to the trucker, the lunch help and cleaning crew we appreciate you all. For the professionals we hire to work with us on herd health, feeding, veterinary needs, and sale preparation we want to thank you. Without the help of our crew, family, friends and neighbors during, calving, branding, weighing and shipping we would never be able to pull off these sales.

To the friends who give their time the weekend before the sale to help Mike & Ted clean, retag, and feed the bulls before the sale and then work sale day we owe you!

To our sale day crew on the auction block and the ring men we appreciate your efforts in running a smooth sale.

For the great photos of the bulls we thank John Goggins, and thank you to our auctioneer, Roger for always doing a great job.

To those of you who are joining us on sale day our heartfelt thanks for you support.
