

39th Annual Bull Sale

# GOLLAHER RANCH

Monday

04★02★2018

1:00

At the ranch  
Cascade, Montana

**75** YEARLING ANGUS  
PERFORMANCE TESTED  
BULLS SELL

39th Annual

# **GOLLAHER RANCH** **BULL SALE**

At the ranch • Cascade, MT • Lunch Served at 12:00 Noon

**MONDAY**  
**APRIL 2, 2018 • 1:00 PM**

### *Sale Location*

Gollaher Ranch is located 6 miles SE of Cascade, MT. Take Exit 254 (from S) or 256 (from N) off Interstate 15, turn East on Central Avenue, cross the Missouri River and follow MT Hwy 330 to the ranch. Watch for signs.

### *Delivery*

Gollaher Ranch will deliver bulls free for the first 250 miles, after that charges will be at cost. Delivery will occur as soon as possible after the sale.

**Sale Day Phone**  
**406.468.2273**

### *Insurance*

Bull Mortality & Loss of Use Insurance through Tyler Holland of XL Catlin Insurance Company. See information on page 16.

**Auctioneer:**  
**Roger Jacobs**  
**406.373.6124**

### *Announcements*

Announcements from the block by the owners or auctioneer will take precedence over printed material. Supplemental data and corrections will be available sale day.

### *Bidding*

Absentee bidding may be made with any of the livestock press representatives or the auctioneer, Roger Jacobs. Contact the Gollaher family if you need any other assistance or have questions

### *Terms and Conditions*

All bulls sell under the terms of the American Angus Association. Settlement must be made at the time of sale unless prior arrangements have been made with the owners.

### *Livestock Press Representatives*

John Goggins..... 406.698.4159  
Western Livestock Reporter  
Kurt Kangas.....406.366-4190  
American Angus Assn

### *Liability*

Gollaher Ranch or Myrle or Delight Gollaher will assume no liability whatsoever for any accidents or injury which may occur sale day.

### *Health*

All bulls have been semen tested with a complete breeding physical under the direction of Hilt Veterinary Service, Dutton, MT. All bulls will be BVD tested.

### *Transportation & Accommodations*

Gollaher Ranch is 30 minutes south of Great Falls International Airport. Motel accommodations available in Cascade:  
Badger Motel 406-468-9330  
Please contact us for further assistance.

### *EPD Data*

Data not contained in this catalog for the individual bulls will be available sale day. EPD's are as of 03-02-2018. Final weights and scrotal measurements available sale day.

***Buying, Selling And Raising Cattle With  
An Emphasis On Quality Angus Traits.***

---

It seems like only yesterday we were preparing for our 1st bull sale. 2018 is here and we are preparing for the 39th annual sale. We are pleased with the performance of the bulls considering the extreme weather they have endured during their first year of life. One of the hottest and driest summers on record followed by one of the coldest winters with record snow fall. To say they are hardy and adaptable is an understatement.

With the new genetic program kicked off by the American Angus Assn., we did DNA testing on all the bulls and replacement heifers born in 2017. These new tests gave us a broader view of our herd and we like the enhanced Epd's as a result of testing. We were pleased with the results and will continue to provide information on our cattle to our producers.

We hope we are about to the end of a long winter and looking forward to spring. Calving is wrapping up and it has been a very busy season with its ups and downs with the weather being so brutal.

Here is to 2018 and hope the demand for quality cattle continues, including good prices and heavy weights. Thank you for looking over our sale bulls and hope you find what you need.

.....The Gollahers

*For dollars invested in bulls, we offer the best value you will find anywhere.*

***Due to scheduling and weather conditions we have no individual lot photos this year.***

*Jade is the 5th generation of the Gollaher family to live on the ranch at Cascade, MT. The Gollaher family has owned ranchlands at Cascade, MT for over 100 years.*

## Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs). EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
  - more accurate selection
  - easier identification of genetic outliers
  - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at [www.angus.org](http://www.angus.org).

### How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis.

## Thank you...

Thank you to all who make our sale possible. From you the buyers, to the trucker, the lunch help and cleaning crew we appreciate you all. For the professionals we hire to work with us on herd health, feeding, veterinary needs, and sale preparation we want to thank you.

Without the help of our crew, family, friends and neighbors during, calving, branding, weighing and shipping we would never be able to pull off these sales.

To the friends who give their time the weekend before the sale to help Ted clean, retag, and feed the bulls before the sale and then work sale day we owe you!

To our sale day crew on the auction block and the ring men John Goggins and Kurt Kangas we appreciate your efforts in running a smooth sale.

To our auctioneer, Roger for always doing a great job.

To those of you who are joining us on sale day our heartfelt thanks for you support.

**Thank you to our ranch veterinarian:  
Clint Hilt, DVM, Hilt Veterinary Service, LLC  
Dutton, MT 59433, 406.463.2426**

**We appreciate all your dedication to our program  
whether it's for the cattle or horses.**

for over 25 years.

Coverage	
<p>The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury. The endorsement for Accident, Sickness &amp; Disease (ASD) Infertility provides coverage in the event of permanent impotency, infertility or the bull inability to naturally service cows as a result of an accident, sickness, or disease sustained during the policy.</p>	
Option 1	Option 2
<p><b>Bull Mortality and Infertility Coverage</b></p> <p><b>Values</b> Not to exceed purchase price</p> <p><b>Term</b> One Year Policy Term</p> <p><b>Premium</b> 5.80% Cattle Mortality Coverage Only <b>(100% Indemnity)</b></p> <p><b>Testing</b> All bulls must be tested, certified and listed in the official catalog of a herd sale</p> <p><b>Full Mortality</b> 100% of the value of the bull in the event of death or humane destruction as a result of a life-threatening injury.</p> <p><b>Accident, Sickness &amp; Disease (ASD) Infertility</b> 80% of the value of the bull, less salvage value, in the event of permanent impotency, infertility or being incapable of serving females as a result of an accident, illness, or disease sustained during the policy.</p>	<p><b>Bull Mortality Coverage</b></p> <p><b>Values</b> Not to exceed purchase price</p> <p><b>Term</b> Renewable One-Year Policy Term for Bulls 6 Month - 7 Years of age</p> <p><b>Premium</b> 12.30% Mortality + Accident, Sickness, Disease &amp; Infertility <b>(100% Indemnity less Salvage)</b>  12.80% Mortality + Accident, Sickness, Disease &amp; Infertility <b>(100% Indemnity less Salvage)</b></p> <p>*Nebraska, North Dakota and South Dakota only</p> <p><b>Testing</b> Signed statement of health required for all bulls for which coverage is requested.  Veterinarian examination required on bulls of \$50,000 or more</p> <p><b>Full Mortality</b> 100% of the value of the bull in the event of death or humane destruction as a result of a life-threatening injury.</p>

# American Angus Association® Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire’s genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire’s ability to transmit yearling height, expressed in inches, compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire’s daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

## \$VALUE INDEXES

**\$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade (\$QG)** represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

**Yield Grade (\$YG)** \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
