**406-468-2273**

---

**www.gollaherranch.com • gollaherranch@yahoo.com**

Welcome to the 41st annual Gollaher Ranch yearling bull sale. Thank you for looking over our sale offering.

We are offering a set of bulls that we feel were bred to provide calving ease, without compromising their performance for growth, feed efficiency and carcass value. These are all traits sought by our progressive cattle producers and buyers.

Over 60% of the bulls are suitable for use on heifers. We have tried to emphasize length of body, depth, muscling, and temperament in selecting bulls for the sale. This offering is a good growthy set of calves who will mature into a great set of cow bulls, adding to their value and a nice return on your original investment.

All data in the catalog is as of March 1, 2020. Final weights and scrotal measurements will be available sale day. If you have any questions about our operation, the bulls, the sale or our cow herd please contact us.

Thank you for looking over our sale offering and we look forward to seeing you on Monday April 6th. Lunch is at noon and the sale starts at 1 pm.

The Gollahers

*For dollars invested in bulls, we offer the best value you will find anywhere.*

41st Annual

# GOLLAHER RANCH BULL SALE

At the ranch • Cascade, MT • Lunch Served at 12:00 Noon

**MONDAY**  
**APRIL 6, 2020 • 1:00 PM**

### *Sale Location*

Gollaher Ranch is located 6 miles SE of Cascade, MT. Take Exit 254 (from S) or 256 (from N) off Interstate 15, turn East on Central Avenue, cross the Missouri River and follow MT Hwy 330 to the ranch. Watch for signs.

### *Delivery*

Gollaher Ranch will deliver bulls free for the first 250 miles, after that charges will be at cost. Delivery will occur as soon as possible after the sale.

### **Sale Day Phone**

**406.468.2273**

### *Insurance*

Contact Tyler Holland to handle the insurance needs for your bull purchases. See page 10 for contact information.

### *Auctioneer:*

**Roger Jacobs**

**406.373.6124**

### *Announcements*

Announcements from the block by the owners or auctioneer will take precedence over printed material. Supplemental data and corrections will be available sale day.

### *Bidding*

Absentee bidding may be made with any of the livestock press representatives or the auctioneer, Roger Jacobs. Contact the Gollaher family if you need any other assistance or have questions

### *Terms and Conditions*

All bulls sell under the terms of the American Angus Association. Settlement must be made at the time of sale unless prior arrangements have been made with the owners.

### *Livestock Press Representatives*

John Goggins..... 406.698.4159  
Western Livestock Reporter  
Kurt Kangas.....406.366-4190  
American Angus Assn

### *Liability*

Gollaher Ranch Companyr will assume no liability whatsoever for any accidents or injury which may occur sale day.

### *Health*

All bulls have been semen tested with a complete breeding physical under the direction of Hilt Veterinary Service, Dutton, MT. All bulls will be BVD tested.

### *Transportation & Accommodations*

Gollaher Ranch is 30 minutes south of Great Falls International Airport Motel accommodations available in Cascade:  
Badger Motel 406-468-9330  
Please contact us for further assistance.

### *EPD Data*

Data not contained in this catalog for the individual bulls will be available sale day. EPD's are as of 03-01-2020. Final weights and scrotal measurements available sale day.

***Buying, Selling And Raising Cattle With  
An Emphasis On Quality Angus Traits.***

***Thank you to our ranch veterinarian:  
Clint Hilt, DVM, Hilt Veterinary Service, LLC  
Dutton, MT 59433, 406.463.2426  
We appreciate all your dedication to our program  
whether it's for the cattle or horses.***

## ***Thank you...***

Thank you to all who make our sale possible. From you the buyers, to the trucker, the lunch help and cleaning crew we appreciate you all. For the professionals we hire to work with us on herd health, feeding, veterinary needs, and sale preparation we want to thank you.

Without the help of our crew, family, friends and neighbors during, calving, branding, weighing and shipping we would never be able to pull off these sales.

To the friends who give their time the weekend before the sale to help Ted clean, retag, and feed the bulls before the sale and then work sale day we owe you!

To our sale day crew on the auction block and the ring men John Goggins and Kurt Kangas we appreciate your efforts in running a smooth sale.

To our auctioneer, Roger for always doing a great job.

To those of you who are joining us on sale day our heartfelt thanks for you support.

# American Angus Association Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

## FOOT SCORE

**Claw Set (Claw)**, is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

**Foot Angle (Angle)**, is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

## CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

**\$Value Indexes**, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

**Feedlot Value (\$F)**, expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.
